Vaulted ceiling ideas are the epitome of unique design features and look beautiful in all types of home. Typically, you will have a large amount of space overhead and a [vaulted ceiling](#) describes a ceiling where beams angle up from the walls towards the roof, meeting in the center. They can also be slightly elevated on one side and they are usually constructed with support.

2. PROVIDE A FOCAL POINT – OR TWO

‘One way to upgrade your existing vaulted ceiling or make the most of your newly planned investment is to select a statement light fixture,’ advises Kristin Bartone, creative director and principal designer at [Bartone Interiors](#).

‘This provides a focal point for the viewer’s eye to rest within the large space. Also consider adding clerestory windows like the ones shown here to add additional light and architectural detail.’
